

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (Original) Telecommunication terminal (T_U) comprising means for transmitting a stream (f_u) of packets of data to an access router (R) to a telecommunication network (N), characterized in that it comprises means for inserting client information into said stream indicating if said stream corresponds to a mobile telephone standard.
2. (Currently Amended) Telecommunication terminal according to ~~the preceding claim~~claim 1, wherein said standard is the Universal Mobile Telecommunication System (UMTS) standard.
3. (Currently Amended) Telecommunication terminal according to ~~either claim 1 or claim 2~~claim 1, wherein said client information is inserted into a header of said packets.
4. (Original) Telecommunication terminal according to claim 3, wherein said client information is inserted into a hop-by-hop option header of said packets.

Preliminary Amendment
Attorney Docket Q86072

5. (Original) Router belonging to a telecommunication network, comprising means for receiving streams of packets of data, characterized in that it comprises means for determining if said stream corresponds to a mobile telephone standard from client information inserted in said stream and means for implementing quality of service assurance mechanisms as a function of what is determined in this way.

6. (Currently Amended) Router according to ~~the preceding claim~~claim 5, taking the form of an access router to said telecommunication network.

7. (Currently Amended) Router according to ~~either claim 5 or claim 6~~claim 5, wherein said quality of service assurance mechanisms depend on other information on the client contained in said stream.

8. (Currently Amended) Router according to ~~either claim 5 or claim 6~~claim 5, additionally comprising means for notifying a billing server, indicating if said stream corresponds to a mobile telephone standard.
